Assignment - 02

Project Name :- Clear Sign

Purpose :- Understand the document before you sign it. It protects non-expert individuals from signing documents they do not fully understand. Million of people daily sign legally binding documents without legal or financial expertise. ClearSign will help employs the risks of document before signing it.

DAY: _____

DATE: _____

Use Case :-

There is a Freelancer, his goal is to identify risky or predatory clauses in a legal contract.

He will upload his contract on ClearSign.

He will run legal advisor module on it.

The module will read the document and tell what is the risk of this document. for example if the work done by him is property of the other party or non-compete, etc.

If no risk found the system will tell no risk found.
